

KM:

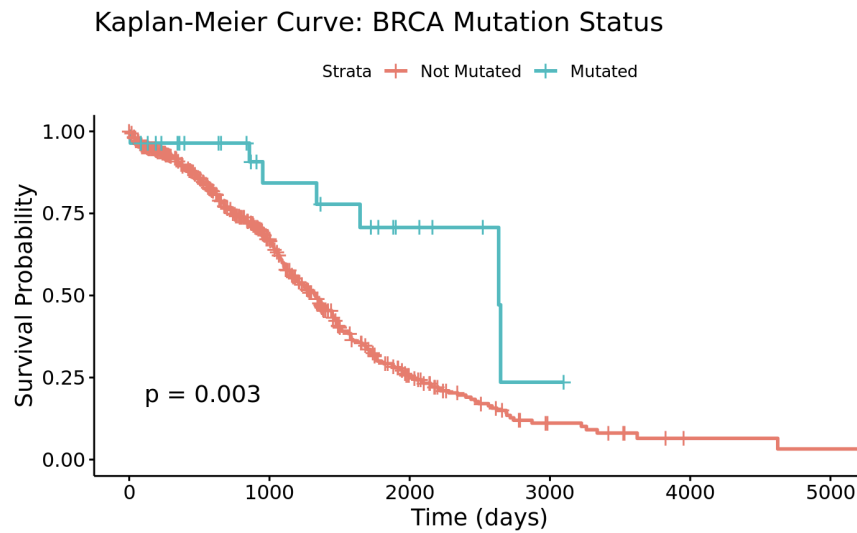

Figure 1. Plot of survival probabilities of ovarian cancer patients with any mutation in either the BRCA1 or BRCA2 genes (Mutated) against those with no mutations in these genes (Not Mutated).

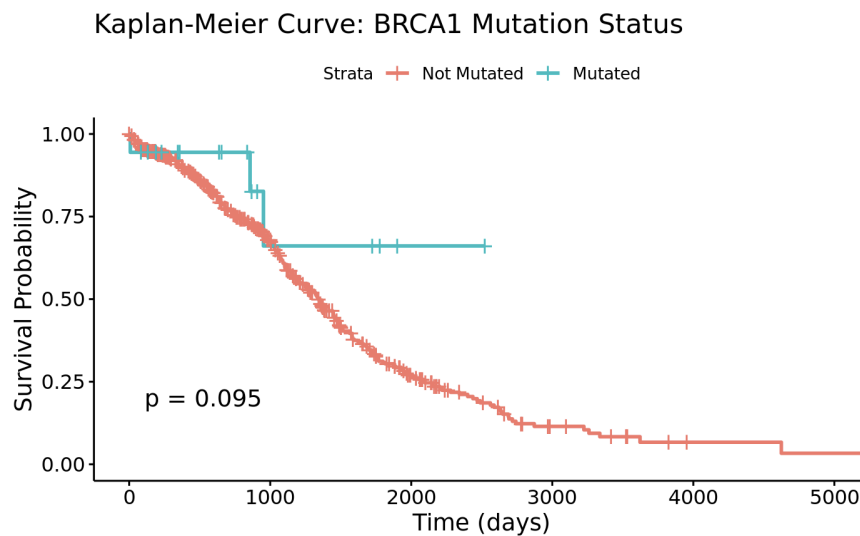

Figure 2. Plot comparison of the survival probabilities of patients with a mutation specifically in the BRCA1 gene (Mutated) versus those without a BRCA1 mutation (Not Mutated).

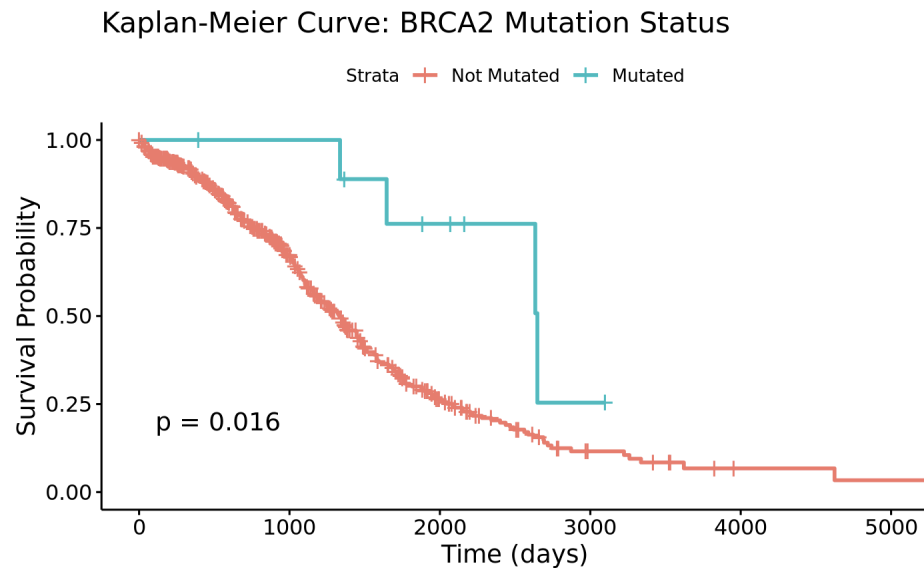

Figure 3. Plot comparison of the survival probability of patients with a mutation specifically in the BRCA2 gene (Mutated) versus those without a BRCA2 mutation (Not Mutated).
